

Nebraska Public Service Commission

Application No. 911-045/PI-166

November 15, 2012

Comments:

The State of Iowa is not initiating implementation of text-to-911 functionality. Iowa has made changes to its current wireless 911 network. We have migrated to an IP-based network which puts us in position to accept the text-to-911 technology as it becomes available from the carriers.
