Subject: Text to 911

I am not filing any of the forms at this time as we have not persued the cost issue associated with texting to 911. We installed a new viper system in January,2013 which has the capabilities of taking text 911 calls. Of course it is going to take some upgrades as always there is expense whenever you attempt any new ideas with technology.

Thurston County is not a rich county and would hope that this cost would be covered by the NPSC or at least we would be permitted to use our set aside funds to cover this cost.

Since this new addition would be entirely wireless 911 I do not thing the percentage basis should come into play but should be funded entirely by the NPSC or at least by set aside funds.

Thank You.

Gayle Dahlman

Thurston Co. PSAP Supervisor
